

PRASIDDA GAUTAM

Dallas, Texas 76040, United States of America

📞 682-246-1771 ✉️ prasiddagautam5@gmail.com [in https://linkedin.com/in/prasidda-gautam](https://linkedin.com/in/prasidda-gautam) github.com/prasidda

Education

University of Texas, Austin

August 2023 – May 2027

Bachelor of Science in Computer Science, Business Minor

Austin, TX

Relevant Coursework

- Data Structures, Discrete Math, Algorithms Analysis, Matrices, Artificial Intelligence, Linear Algebra, Computer Architecture, Calculus, Operating Systems, Cloud Computing, Software Engineering

Experience

Texas Comptroller of Public Accounts

September 2025 – December 2025

Fullstack Developer Intern

Austin, TX

- Developed and implemented the Field Appraisal System utilizing REACT front end, C# .NET with MS SQL backend microservices.
- Created a file import system utilizing integrated Backend-for-Frontend (BFF) API with uploads to Amazon S3 for virus scans and asynchronous processing and workflows.
- Developed scalable backend microservices using .NET 8, implementing domain driven architecture and leveraging MediatR for CQRS and decoupled communication.
- Integrated with SQL database for robust data management and exposed RESTful APIs enabling seamless user experience.

Outlier AI

May 2024 – May 2025

AI Evaluator

Remote

- Performed evaluations of multiple LLMs and generative AI systems for companies such as Amazon, Apple, and Microsoft, increasing inference accuracy.
- Created advance training frameworks for companies such as Meta, Google, and Open AI, increasing generative AI online model efficiency.
- Provided data-driven feedback using reports of test results to client AI development teams and other team members, cutting overall error rates in models.

FedEx Supply Chain

May 2024 – August 2024

FedEx Supply Chain Associate

Coppell, TX

- Through the relocation of 300+ mobile devices based on performance metrics, optimized logistics workflows and boosted operational throughput by 15%.
- Achieved safe working environment and met daily dispatch targets by coordinating cross-functional teams of 20+ employees and management.
- Achieved a 100% success rate in training 5+ new hires in standard operating procedures and inventory management.

Projects

Weather App | React, Vite, HTML CSS, JavaScript, AI APIs, TypeScript

December 2024

- Utilized Vite and React to develop a responsive weather application to display real-time conditions.
- Integrated OpenWeather API and Rapid AI GeoDB Cities API to fetch and display accurate weather data for any location provided through the APIs.
- Implemented clean front-end using HTML, CSS, and JavaScript, enhancing user experience and UI readability.
- Boosted app responsiveness by 50% through the use of asynchronous data fetching for instant updates. .

CPU Emulator | C, Git, AArch64 Assembly, GDB, SSH, Remote Development

November 2024

- Developed a fully functioning CPU that replicated real processor behavior through a multi-stage pipeline (fetch, decode, execute, memory, and writeback).
- Engineered a fully functioning cache management and hazard control system, lowering memory access rates by 300%.
- Tested using AArch64 Assembly for performance optimizations, debugged in GDB, and made use of Git for version control.
- Utilized UTCS Linux machines through SSH for remote development, cementing cross-platform reliability and efficient resource usage.

Technical Skills

Languages: Java, C, C#, HTML/CSS, JavaScript, TypeScript, AArch 64 Assembly, Python

Developer Tools: VS Code, Visual Studio, Eclipse, Git, GDB, SQL Server Data Tools (SSDT), .NET CLI, NuGet, Swagger, React Development Tools, ChatGPT, GitHub Copilot, AWS, Rest APIs

Technologies/Frameworks: Node.js, React, Spring Boot, SQL Databases, .NET 8, MediaR, ASP.NET Core Web API, Domain-Driven Design (DDD)
