Education

University of Texas at Austin

August 2023 – May 2027

Bachelor of Science in Computer Science; Minor in Business; 3.7 GPA / 3.6 Major GPA

Austin, TX

Relevant Coursework

- Data Structures, Discrete Math, Algorithms Analysis, Matrices, Artificial Intelligence, Linear Algebra, Computer Architecture, Calculus, Operating Systems, Cloud Computing, Software Engineering

Experience

Texas Comptroller of Public Accounts

September 2025 – December 2025

Fullstack Developer Intern

Austin, TX

- Developed production-ready Field Appraisal System utilizing React front end, C# .NET with MS SQL microservices, supporting data-driven decision making and internal state workflows.
- Implemented a file import pipeline utilizing Backend for Frontend (BFF) API and Amazon S3, enabling virus scans and asynchronous processing for scalability and reliability.
- Built scalable .NET 8 microservices using domain-driven architecture and CQRS with MediatR, improving maintainability and independent service evolution.
- Implemented RESTful APIs backed by SQL databases to support transactional workflows, improving data consistency and end-user responsiveness through collaborative design and code reviews.

Outlier AI

May 2024 – May 2025

AI Evaluator

Remote

- Evaluated large language models and generative AI systems for enterprise clients, including Amazon, Apple, and Microsoft, identifying failure cases and improving inference accuracy through structured testing.
- Created advanced training and evaluation frameworks for AI systems used by Meta, Google, and OpenAI, increasing generative AI model response quality and reliability.
- Provided data-driven performance reports to AI development teams, cutting overall error rates in models and improving alignment with real-world cases.

FedEx Supply Chain

May 2024 – August 2024

FedEx Supply Chain Associate

Coppell, TX

- Through the relocation of 300+ mobile devices based on performance metrics, optimized logistics workflows and boosted operational throughput by 15%.
- Achieved safe working environment and met daily dispatch targets by coordinating cross-functional teams of 20+ employees and management.
- Achieved a 100% success rate in training 5+ new hires in standard operating procedures and inventory management.

Projects

EducaNation – Fullstack Web Application | React, Flask, PostgreSQL, Docker, AWS

December 2025

- Designed and developed a Fullstack web application able to serve 50K+ relational records and pagination with less than 300 ms average API response times to serve an underserved community.
- Developed RESTful APIs with server side pagination and query filtering, reducing payload sizes by around 70% and improving front end scalability and loadtime.
- Built responsive UI components and interactive data visualizations with React, Bootstrap, D3, and Recharts; used AWS Amplify for front end development.
- Worked in a cross functional 5 people team using Git based workflows, peer code reviews, and CI tested backend services, maintaining a 90%+ test coverage with PyTest and GitLab.

Weather App | React, Vite, HTML CSS, JavaScript, AI APIs, TypeScript

December 2024

- Utilized Vite and React to develop a responsive weather application to display real-time conditions.
- Integrated OpenWeather API and Rapid AI GeoDB Cities API to fetch and display accurate weather data for any location provided through the APIs.
- Implemented clean front-end using HTML, CSS, and JavaScript, enhancing user experience and UI readability.
- Boosted app responsiveness by 50% through the use of asynchronous data fetching for instant updates.

Technical Skills

Languages: Java, C, C#, HTML/CSS, JavaScript, TypeScript, AArch 64 Assembly, Python

Developer Tools: VS Code, Visual Studio, Eclipse, Git, GDB, SQL Server Data Tools (SSDT), .NET CLI, NuGet, Swagger, React Development Tools, ChatGPT, GitHub Copilot, AWS, REST APIs

Technologies/Frameworks: Node.js, React, Spring Boot, SQL Databases, .NET 8, MediatR, ASP.NET Core Web API, Domain-Driven Design (DDD)
